Please Be Advised!

YOU Are Responsible for Preparing and Understanding Device PRIOR to Starting the Exam

These resources are intended to help guide you through the setup process, but they **are not** intended to serve as complete technical support for your specific device or computer configuration.

Test takers are responsible for becoming familiar with their device settings, including camera permissions, browser settings, security settings, and general computer functionality required to complete the exam process.

Due to the wide variety of devices, operating systems, and personal computer configurations, USA Gymnastics is unable to provide comprehensive technical support for every individual setup.

If you are uncertain how to configure your device, we strongly encourage you to spend time becoming familiar with your computer prior to testing and seek assistance from your device manufacturer's support resources, trained technical support individuals, or friends and family members who are familiar with your device and settings.
